

Snake Bites & Pets

Knowing the Symptoms of Snake Bite Envenomation

WHAT TO DO:

If your cat/dog is suddenly showing any of the above signs:

- Keep your pet calm and restrain movement (place in crate/pet carrier)
- Take your dog/cat to the vet IMMEDIATELY
- any information you can take note of may be useful to identify the snake, however it is more important that your dog gets to the vet ASAP

WHAT NOT TO DO:

- Do NOT wash the bite site
- Do NOT try to catch or kill the snake
- Do NOT apply a tourniquet or pressure bandage
- Do NOT panic
